COMMERCIAL PROPOSAL

College ERP + LMS | Initial Semester Rollout

PREPARED FOR GRD Group of Colleges (Guru Ram Das Group of Colleges), Ropar grdropar.in	PREPARED BY EduBridge ERP & LMS
PROPOSAL DATE 12 September 2026	WEBSITE edubridgeerp.in

ERP + LMS rollout for up to 150 students with web access for administrators, faculty and students.

1. Executive Summary

EduBridge ERP & LMS is proposed for the upcoming semester for approximately 150 students. The setup will provide secure web access for administrators, faculty and students, with the core academic, fee and learning workflows configured for the college.

Student records will continue from semester to semester, keeping academic, attendance, fee and LMS history together. Additional student batches and modules can be added as the college's usage grows.

Initial Rollout Focus

- Up to 150 students for one semester
- Web logins for Admin, Faculty and Students
- ERP + LMS with fee, academic and learning workflows
- Onboarding, configuration, training and standard remote support included
- Mobile apps and expanded modules can be introduced later as required

2. Initial Phase Scope

The initial scope is based on the workflows discussed during the demonstration and can be configured to match the college's day-to-day process.

Student & Academic Management

- Student profiles and semester-wise progression
- Program, course, semester, subject and academic structure
- Faculty / subject mapping and role-based access
- Student onboarding and import workflow to be finalized against the college's source data format

Fee Management & Reports

- Program-wise standard fee structures
- Student-specific concessions, adjustments and fee overrides
- Mid-session / migrated-student fee adjustment support
- Fee collection, receipts and management reports

Attendance & Internal Assessment

- Student attendance tracking
- Configurable weightage for attendance, assignments, tests and activities
- Continuous student performance score for internal assessment
- Student visibility into performance areas requiring improvement

Examination & Academic Workflows

- Examination and result workflows
- Question / assessment management
- Teacher review, marks and feedback workflows
- Academic calendar and reporting support

3. Learning Management System (LMS)

The LMS is designed for day-to-day academic delivery, resource sharing, assignments and assessments through the same institutional platform.

Study Material & Resources

- Upload and share notes, PDFs, worksheets and academic resources
- Multiple-file drag-and-drop upload for faster faculty workflows
- Class / subject-based resource organization
- Student access through secure web login

Assignments & Assessments

- Assignments / homework and assessment workflows
- Manual / standard question creation and teacher review
- Question paper and answer-key PDF outputs where applicable
- Marks, feedback and student performance tracking

4. Optional AI Subscription

AI tools are available as an optional subscription and can be configured according to the college's actual requirements and expected usage.

AI services are available as an optional subscription.

The AI subscription will be configured and priced separately according to the college's selected requirements, expected usage and required capacity.

- AI-assisted question and assessment generation
- AI-assisted answer evaluation, marks suggestions and feedback
- AI-supported academic analytics and workflow automation
- AI-assisted extraction from PDF, scanned and handwritten forms, subject to source quality and selected workflow

5. Additional ERP Modules Available

The platform can be expanded as the college's adoption grows. Additional standard modules available for activation/configuration include:

Admission Management	Department / HOD Management	Faculty & Employee Management
Timetable Management	Library Management	Inventory / Asset Management
Hostel Management	Alumni Management	Anti-Ragging Management
NAAC-related Management	Events / Activities / Achievements	Exam Seating Plan / Invigilation
Notifications / Communication	Management Dashboards & Reports	Mobile App Access (future phase)

6. Implementation Approach

1	Confirmation & Kick-off	Confirm initial scope, nominated college coordinators and semester rollout plan.
2	Configuration & Data Setup	Configure programs, semesters, subjects, fee structures, users and required workflows. Student import format will be reviewed before bulk onboarding.
3	Training & Validation	Conduct role-based onboarding for administrators / faculty and validate the agreed workflows.
4	Go-Live	Activate up to 150 students with secure web logins for the agreed semester rollout.
5	Semester Continuity	Carry student records forward into subsequent semesters and add future batches under the renewed or expanded subscription scope.

7. Commercial Offer

INITIAL SEMESTER SUBSCRIPTION

INR 25,000

INCLUSIVE OF APPLICABLE TAXES

Student Coverage	Up to 150 active students in the initial semester
Access	Admin, Faculty and Student web logins
AI Services	Separate subscription - priced according to selected requirements and expected usage

8. Commercial & Scope Notes

- The semester subscription covers up to 150 active students and includes applicable taxes.
- The initial scope is web-based. Mobile application access can be introduced later if required.
- AI services are subscribed separately and will be priced according to the college's selected requirements and expected usage.
- Bulk student onboarding will be finalized after reviewing the college's source data format.

- Custom integrations, institution-specific development or major workflow changes outside the standard platform scope will be discussed and agreed separately.
- Renewal for subsequent semesters and additional student batches will be based on active student count and the agreed scope.
- Proposal validity: 15 days from the proposal date. The payment schedule can be finalized at confirmation.

9. Why EduBridge for This Rollout

Simple Start Begin with a defined group of up to 150 students and expand after successful adoption.	Flexible College Workflows Program-wise fee setup, student-specific adjustments, LMS and internal assessment workflows in one platform.
Scalable by Semester Carry the same student records forward and add future batches semester by semester.	AI When You Need It Keep the core subscription predictable and activate AI tools separately according to requirement and usage.

10. Next Step

On approval, EduBridge will finalize the semester configuration checklist, confirm the student data onboarding format, and schedule setup and training for go-live.

11. Proposal Acceptance
